

Julia Hasty

PHD MATERIALS SCIENTIST · CLEAN ENERGY, WATER & AI SYSTEMS

Emeryville, CA

■ 540.798.2312 | ✉ jay@resilientmarkets.com | 📷 [hastyjaybird](#) | 🌐 [dr-jay](#)

PhD materials scientist · 1,000+ clean energy deployments in 35+ countries · 3 U.S. patents · 2018 Water Abundance XPrize winner · NSF PI

Experience

Resilient Markets

Albany, CA

MANAGING PARTNER

2020 – Present

- Microgrid assessments (biomass, solar, battery); MaxETA contract — Puerto Rico Energy Bureau 2026 rate case; deployed AI tools to manage public comment, discovery, and case records
- Independent project: built ClimateDash (Dec 2025 – present), a personal multi-agent AI prototype for climate-tech research and deal-flow discovery — 9+ specialized agents orchestrated via n8n, Claude (Haiku/Sonnet) quality gating and analysis, knowledge graph with entity extraction, HITL approval workflows via Telegram; deployed on Hetzner VPS with Docker, Supabase, and Caddy

10Power

San Francisco, CA

TECHNICAL LEAD

2020 – Present

- Published 2024 Eklutna Energy Plan for Alaska Native Village of Eklutna; tribal microgrid grants; preliminary designs for data center waste-heat greenhouse to extend growing season outside Anchorage

Corvidae, LLC

Oakland, CA

FOUNDER

2017 – 2020

- 15+ clean-tech clients; led IOGS microgrid project for a 51-building, 5M sq ft Puerto Rico industrial park (25.2 MW / 75.6 MWh contemplated battery capacity) through design and engineering, including project timeline and financial modeling with Qualified Opportunity Zone tax compliance
- Co-founded ACEPR: accelerator enabling Puerto Rico's first electric utility cooperatives under 2019 legislation, spanning a 46 MW hydroelectric dam, a 150-building mixed residential/commercial portfolio, and 800 distributed homes

SkySource (ALL Power Labs joint venture)

Berkeley, CA

DIRECTOR OF ENGINEERING — 2018 WATER ABUNDANCE XPRIZE WINNER (\$1.5M)

2018

- Led team through design, integration, testing, and validation of a biomass-powered atmospheric water system: 2,000 L/day at ~2¢/L; concurrent with COO/VP BD role at Box Power

ALL Power Labs

Berkeley, CA

FOUNDER & ENGINEERING DIRECTOR

2009 – 2017

- Led 15 engineers; 1,000+ deployments in 35+ countries; NSF SBIR Phase I Principal Investigator (\$225K); USAID project (250 homes, Liberia); named inventor on 3 U.S. patents (compact gasifier-genset architecture, 2014–2017)

Stony Brook University

Stony Brook, NY

PHD RESEARCHER & ADJUNCT PROFESSOR

2010 – 2016

- PhD, Materials Science & Engineering; nano-catalyst synthesis for syngas-to-mixed-alcohol conversion; 2 peer-reviewed papers (*Fuel*, *J. Renewable and Sustainable Energy*) and 10+ conference talks/posters (AIChE, NSF-CBERD, COP21 Paris)
- Personally sourced, installed, and commissioned the lab's core instrumentation and pilot-scale reactor suite (GC/GC-MS, HPLC, fixed-bed/slurry-phase/fluidized-bed reactors) in a newly-founded research center — an estimated \$150K–\$450K in equipment

CPWater Tech, Box Power, NanoSulf, Portland Biodiesel, Red Cross NAT Lab

EARLIER ROLES

2007 – 2021

Skills

Laboratory

NMR, FTIR, UV-VIS, HPLC, PCR, GC-MS, SEM, TEM, EDS

Engineering

Gasification (10–150 kW), microgrids, water systems, automation

Domain

Biomass, biochar, energy policy, grant writing, tribal energy programs

Tools

Python, $\LaTeX$, Solidworks, ChemCAD, Fusion360

Languages

Conversational Spanish — effective working directly in Spanish-speaking communities (Puerto Rico field/community engagement)

Education

Stony Brook University

PH.D., MATERIALS SCIENCE & ENGINEERING

NY

Radford University

B.S., CHEMISTRY

VA

Honors & Patents

SkySource **XPrize Winner**, Water Abundance 2018

2017 **Patents**, US 8,829,695 & 9,476,352

Grants, NSF PI; USAID Liberia; NYS & NSF (CPWater)
